SUMMARY

Software engineer with 2+ years of experience, including internship, at OpenText. Builds backend services, cloud-connected systems, observability workflows, and data pipelines using Python, Java, SQL, PostgreSQL, Kafka, and Kubernetes.

PROFESSIONAL EXPERIENCE

Associate Software Developer | OpenText
Oct 2024 – Present | Bengaluru

- Redesigned UUID storage in a distributed cloud-connectivity service, increasing supported inter-region connections from 55 to 165 without a database schema migration.
- Built a time-series baseline service with dynamic upper and lower bounds and routing between raw 5-minute data and hourly aggregates for observability queries.
- Built a case-aware dual-memory agent for staged evaluation; the evaluation reduced escalations from 20 to 5 and measured lower latency, token use, and model calls per ticket.
- Prototyped a CVE workflow spanning advisory ingestion, normalization, inventory matching, and network-automation remediation; estimated about 60% less manual triage effort.

Software Engineering Intern | OpenText
Apr 2024 – Sep 2024 | Bengaluru

- Built Python and SQL automation for license-usage extraction and CSV reporting, replacing repetitive manual reporting work.

SELECTED PROJECTS

SyncStream
Built a CDC prototype using PostgreSQL, Debezium, Kafka, Redis, and Elasticsearch for cache and search projections. Includes retries and dead-letter queues; it remains a local development platform.

Capability Runner
Built LLM-assisted browser workflow discovery and deterministic saved-workflow replay with validation and page-evidence checks; demonstrated on local banking apps with synthetic data.

TECHNICAL SKILLS

Languages: Python, Java, Go, C++, SQL
Backend & systems: FastAPI, Spring Boot, REST APIs, WebSockets, Linux
Data & infrastructure: PostgreSQL, Vertica, Kafka, Redis, Elasticsearch, Docker, Kubernetes, Helm, Git, CI/CD
AI & retrieval: RAG, embeddings, vector retrieval, tool calling, evaluation, LangGraph, MCP

EDUCATION & RESEARCH

B.E. Electronics and Communication Engineering | 2024
Sri Krishna College of Engineering and Technology | CGPA 8.5/10

Adaptive Compute Efficient Learning via Conceptual-Criticality
Co-author, AAAI 2026 Student Abstract
Proof of concept studying adaptive computation. Reported energy comparisons are estimates against an extrapolated 6-layer baseline.

AWARDS & RECOGNITION

CVE agent and customer demonstrations (Put Customers First, 12 February 2026) · Raw-data sleeve visualization (Raise the Bar, 25 July 2025) · Dark mode, reporting and Azure backend (Raise the Bar, 14 February 2025) · AWS and Azure network visualization (Raise the Bar, 24 January 2025)
